Unprecedented Opportunity

Career-9: A Career Track Parallel to Academic Track for Employability

Reliable, Personalized & Proactive Career Solution for AI Era

Thesis. Schools deliver an academic track. **Career-9 delivers the parallel Career Track**—a continuous, personalized career journey that runs from **Grade 6/7 to Grade 12**, in **one mobile app**. In an AI-disrupted market—where choices are not very clear, self-awareness is low, and entry-level roles demand **AI fluency, higher-order human skills, and domain experience**—this **Continuous Career Journey & Skills Development** is **non-negotiable**. A small upfront fee compounds into outsized employment, and well-being returns. It's a no-brainer.

The Problem We Solve

- Parents ask, *"What will my child do after 12th?"* AI disruption + social pressure = **confusion**.
- **Late or misinformed decisions** (subjects/streams) derail specialization, internships, and placements.
- Entry-level hiring now expects **2–3 years of work experience**, **AI skills**, and **human skills**—almost impossible unless one has proactive clarity & adequate training.

Our Mission & Model

Re-engineer career preparation radically from the ground up.

A **journey-based process** that begins with **deep self-discovery** and systematically advances to **stream/subject selection** and **final career choice**. Clarity compounds each year, **reducing mistakes**, protecting life's largest investments (time, tuition, college), and **lowering mental/psychological risk** from unemployment or under-employment.

The Platform (Mobile App, 24×7)

A **personal AI companion, mentor, and trainer**—integrated, always-on, and context-aware.

1. **6-D Psychometric Assessment (90% accuracy).**
    - Scientifically integrated model across six dimensions; **methodology published**.

- **Three variants:** Grades **6–8** (intrinsic strengths), **9–10** (stream/subject), **11–12** (final career).
- Report is simple, video-explained, and often **eliminates the need for human counselling**.

2. **Personalized Counselling (Human → AI-augmented).**
   - Experienced counsellors today; **AI Counsellors** to be added for **scale and lower cost**.
3. **AI-powered Adaptive LMS (Skills Track).**
   - Personalized micro-learning plans that **build AI Readiness, Human Skills, and Domain Readiness**.
   - **Bite-sized content, timely nudges/alerts**, and habit formation—fully aligned to the student's pathway.
   - Runs in **parallel** with schoolwork, keeping the **career quest** visible every week.
4. **Integrated Career & College Library.**
   - Mobile-first search with relevant information on various **career paths, associated college information, requirements, timelines**.
   - Because it's tied to each student's historical profile, guidance is **contextual and personalized** (course/college shortlists that fit).

5. **School Dashboard.**
   - Cohort-level and student-level **strengths, gaps, aspirations**, and **LMS engagement analytics**.
   - **Actionable cohorts** for targeted interventions—preparing students for **AI-era jobs** and giving administrators **clear, NEP-aligned visibility**.

Major Differentiators

1. **Proactive, Skills-First Journey from Grade 6—not** a one-time test.
2. **90% accuracy** with **international publication** and multiple endorsements. *Our accuracy breaks the market skepticism toward current psychometric tools.*
3. **Holistic Skills via LMS—AI + Human + Domain** in one track - *justifying subscription renewal*.
4. **Integrated Career & College Library**—personalized college/career choices from real student data.
5. **School Dashboard**—decision-grade insights for leadership and teachers; useful management tool for schools.

How the App Feels

- A **complete Career Planning OS** that runs **in parallel** to academics—**from first assessment to final applications, delivering Scientific Certainty.**
- A **personal AI career mentor** that answers, clarifies, and nudges **24×7, making it sticky**
- A longitudinal **data graph** of abilities, interests, engagements and habits—spanning **assessments, training, counselling**.
- **Application acceleration:** essays and portfolios grounded in genuine growth and **proof-of-work**.

Roadmap Extension: BET-based Emotional Layer

We're building a **BET (Basic Emotion Theory)** module to uncover root emotional patterns, strengthen resilience, and **supercharge AI readiness training**. Administered alongside the 6-D assessment, the **combined diagnostic + emotional layer** is **unparalleled** in this space.

Why This Wins (Economics & Impact)

- **Non-negotiable**: Without a continuous, structured Career Track, students **choose late, specialize weakly, and interview poorly**.
- **Compounding ROI**: Early clarity → better stream fit → stronger portfolios/internships → superior placements → **financial and emotional upside**.
- **Friction-light**: Delivered on a **phone**, **teacher-light**, with **dashboards** schools can act on.
- **Cost-efficient**: A modest, predictable per-student subscription creates outsized lifetime value.

Career-9 = The Career Track that schools have been missing.

Parallel to academics. Evidence-led. Skills-first. Mobile-native.
Built to deliver certainty in an uncertain, AI-shaped world.

Completely Personalized.
